

KANAE BUNCHE

Frontend Developer | Technical Support & Web Technologies

[Email](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [Koded by Kanae](#)

PROFESSIONAL SUMMARY

Customer-focused frontend developer with hands-on experience troubleshooting websites, supporting users, and building responsive applications using React, JavaScript, and modern web technologies. Strong background in debugging, deployment workflows, UI optimization, communication, and technical problem-solving across both client-facing and internal development environments.

Education: Flatiron School — Full-Stack Web Development Certificate | SUNY Plattsburgh — B.S. Political Science

PROFESSIONAL EXPERIENCE

Owner & Web Developer — Koded by Kanae (2024–Present)

- Designed and maintained responsive business websites using React, TailwindCSS, HTML, CSS, and JavaScript.
- Troubleshot technical issues, optimized website performance, and provided ongoing client support and maintenance.
- Managed deployments, SEO improvements, frontend optimization, and responsive UI enhancements through GitHub and Vercel.
- Worked directly with clients to communicate technical solutions and improve overall user experience.

IT Consultant — Fordham University (2025–2026)

- Built and supported internal platform features using React, Node.js, SQL, and REST APIs.
- Debugged workflows, optimized application performance, maintained technical documentation, and supported platform improvements.
- Collaborated with stakeholders to streamline workflows and improve internal usability across systems.

Coding Instructor — Code for Life (2023–2024)

- Taught HTML, CSS, JavaScript, Node.js, and Express concepts to over 100 students in structured coding programs.
- Managed lesson planning, grading, technical troubleshooting support, and student progress tracking.
- Assisted students with debugging applications and improving development workflows.

Elementary Teacher — Success Academy Charter Schools (2026–Present)

- Developed strong communication, organization, multitasking, and problem-solving skills in fast-paced environments.
- Managed classroom systems, operational responsibilities, student data tracking, and daily instructional planning.
- Communicated consistently with families and staff while adapting quickly to changing priorities and challenges.

SELECTED PROJECTS

ThinkWork Basketball Website — React, TailwindCSS, Stripe Integration | [Live Website](#)

Developed a modern basketball training website featuring responsive layouts, program selection flows, media integration, and interactive user experiences focused on athlete engagement and brand presentation.

Fordham AI Tools Platform — React, Node.js, SQL | [Loom Walkthrough](#)

Developed scalable dashboards, UI systems, and internal platform features for university operations while improving workflow efficiency and usability.

Cybermissions Website Redesign — HTML, CSS, JavaScript | [Live Website](#)

Improved responsiveness, accessibility, mobile usability, and overall user experience for a nonprofit organization.

Koded by Kanae — React, TailwindCSS, Vercel | [View Website](#)

Built and maintained client websites while handling deployment management, responsive design implementation, and frontend optimization.

ChristKid E-Commerce Website — React, E-Commerce UI | [View Project](#)

Designed a premium mobile-first storefront focused on polished UI design, branding, responsive layouts, and modern e-commerce user experiences.
