

KANAE BUNCHE

Full Stack Developer | React Developer | AI-Integrated Web Applications

[GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [Koded by Kanae](#)

PROFESSIONAL SUMMARY

Results-driven full stack developer with experience building scalable responsive websites, AI-integrated applications, and conversion-focused frontend systems for businesses, universities, and nonprofit organizations. Strong technical background in React.js, JavaScript, Tailwind CSS, Node.js, Supabase, REST APIs, deployment workflows, UI/UX optimization, responsive frontend architecture, backend-connected systems, API integrations, debugging, performance optimization, and technical troubleshooting across production-ready web applications.

SELECTED PROJECTS

ThinkWork Basketball — Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Stripe API, Calendly, Framer Motion, Formspre, GitHub, Vercel

[ThinkWork Basketball Live Website](#)

Designed and developed a modern basketball training platform focused on athlete engagement, booking conversion, premium branding, responsive media systems, scalable frontend architecture, mobile-first UI implementation, and interactive package selection workflows optimized across desktop and mobile devices. Managed deployment workflows, frontend optimization, SEO structure, responsive performance improvements, and iterative revisions while collaborating directly with the business owner throughout the complete production lifecycle.

ChristKid E-Commerce Platform — Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Stripe API, Framer Motion, Formspre, GitHub, Vercel

[ChristKid Live Website](#)

Developed a premium e-commerce inspired storefront focused on modern branding, polished frontend presentation, responsive UI systems, scalable customer-facing experiences, mobile-first optimization, interactive product presentation sections, and conversion-focused layouts designed to strengthen customer engagement and frontend usability across desktop and mobile environments.

Fordham AI Tools Platform — Tech Stack: React.js, Tailwind CSS, OpenAI API, Node.js, REST APIs, Google Apps Script, Gmail API, Vercel

[Fordham Platform Loom Walkthrough](#)

Developed AI-integrated web applications and responsive dashboard systems focused on workflow automation, frontend usability, operational support, backend-connected systems, responsive performance, OpenAI-powered tooling, and scalable internal workflows while improving frontend optimization, debugging processes, and long-term platform scalability across university systems.

Koded by Kanae Platform — Tech Stack: React.js, Vite, Tailwind CSS, Supabase, Framer Motion, GitHub LFS, Vercel, GoDaddy

[Koded by Kanae Live Website](#)

Built and maintained a professional full stack portfolio and web design platform showcasing responsive frontend systems, backend-connected functionality, reusable UI architecture, modern branding systems, cloud-connected workflows, and conversion-focused user experiences optimized for scalability, professional presentation, and client engagement.

Cybermissions Website Redesign — Tech Stack: HTML5, CSS3, JavaScript, Responsive Web Design, GitHub, Vercel

[Cybermissions Live Website](#)

Led the redesign and modernization of a nonprofit organization website focused on accessibility, mobile responsiveness, frontend usability, navigation structure, responsive layouts, and improved UI implementation practices across desktop and mobile environments.

PROFESSIONAL EXPERIENCE

Owner & Full Stack Developer — Koded by Kanae (2024–Present)

- Designed, developed, and maintained modern full stack business websites and scalable web applications using React.js, Tailwind CSS, Node.js, Supabase, JavaScript, HTML5, and CSS3 across multiple production-ready client projects.
- Managed responsive frontend systems, backend-connected workflows, deployment pipelines, API integrations, Stripe payment systems, booking functionality, SEO optimization, debugging workflows, and long-term website maintenance.
- Collaborated directly with business owners to translate branding goals and operational requirements into scalable technical solutions optimized across desktop and mobile devices.

IT Consultant — Fordham University (2025–2026)

- Developed scalable AI-integrated platform tools, responsive dashboard systems, and backend-connected university workflows using React.js, Tailwind CSS, Node.js, OpenAI APIs, REST APIs, and JavaScript.
- Improved operational workflows, frontend usability, responsive performance, debugging processes, and platform scalability across internal university systems and web applications.
- Supported frontend optimization initiatives, API-connected workflows, technical troubleshooting, and long-term platform improvements designed to strengthen operational efficiency and user experience.

Coding Instructor — Code for Life (2023–2024)

- Taught HTML, CSS, JavaScript, Node.js, Express, frontend development workflows, debugging strategies, and software engineering fundamentals through project-based coding programs.
- Guided students through responsive frontend implementation, technical troubleshooting, collaborative problem-solving, and hands-on software development practices.
- Managed lesson planning, classroom instruction, student engagement, and structured coding environments across multiple technical learning cohorts.

Elementary Teacher — Success Academy Charter Schools (Ended 2026)

- Developed strong communication, leadership, multitasking, operational management, analytical problem-solving, and organizational skills while coordinating fast-paced classroom systems.
- Collaborated consistently with leadership teams, staff, and families while managing high-performance operational environments and evolving priorities.
- Strengthened adaptability, workflow coordination, data tracking, and professional communication skills through structured educational and operational responsibilities.

EDUCATION & CERTIFICATIONS

Flatiron School — Full Stack Software Engineering Certificate (2023)

CourseCareers — IT Professional Certification (2024)

Bachelor of Arts in Political Science (2023)

TECHNICAL SKILLS

Frontend: React.js, Vite, Tailwind CSS, Framer Motion, React Router DOM, HTML5, CSS3, JavaScript, TypeScript

Backend & APIs: Node.js, Express.js, PostgreSQL, Prisma, Supabase, REST APIs, OpenAI API

Tools & Platforms: Git, GitHub, GitHub LFS, Vercel, GoDaddy, VS Code, Figma

Integrations: Stripe API, Calendly, Formspre, Google Apps Script, Gmail API

Development: Responsive Web Design, Mobile-First Development, UI/UX Design, SEO Optimization, API Integration, Deployment & Hosting
